## Graphing Systems of Inequalities

## Steps for graphing inequalities:

1. Graph the equation represented by the inequality
2. Decide if it's dotted ( $<$ or $>$ ) or solid ( $\leq$ or $\geq$ )
3. Test point(s) in the inequality to find the shaded region.

Systems of Inequalities: graph all inequalities and shade the overlapping regions, this represents the solutions to the system.

Example Solve the system of inequalities by graphing.
$y \leq x+2$
$y>x^{2}$

$$
y \geq x+2
$$

$$
y<x^{2}
$$

Explore Find all the integers coordinates $(x, y)$ that satisfy the equation $x^{2}+y^{2}=5^{2}$. (Hint: think about the Pythagorean Theorem.) Graph these points.
What shape would you get if you find all the non-integer solutions as well?

The equation of a circle centered at the origin with radius $r$ is : $x^{2}+y^{2}=r^{2}$ Example Solve the system of inequalities by graphing.
$x^{2}+y^{2} \leq 36$
$y>x-3$
$y<x+3$

$x^{2}+y^{2}>4$
$y \geq x^{2}$

Graph the system of inequalities and shade the solution.

1. $2 x+3 y<15$
$-6 x+4 y \geq 24$

2. $y \geq x^{2}-4$
$y \leq-x^{2}+4$

3. $x^{2}+y^{2} \leq 16$
$y>x$

4. $x^{2}+y^{2} \leq 9$
$y \leq \frac{1}{2} x$
$y \geq-\frac{1}{2} x$

5. $y>(x-2)^{2}$

$$
y \leq \frac{1}{2} x+2
$$

6. $\begin{aligned} x^{2}+y^{2} & \leq 81 \\ x^{2}+y^{2} & >9\end{aligned}$

## Write the system of inequalities represented by these graphs

6. 

7.

8. Graph this system of inequalities. You will need to factor the first inequality. Shade the solution clearly.
$y \geq x^{4}-5 x^{2}+4$
$y<x^{2}+2$

Check your graph on desmos by typing.
$y \leq x^{4}-5 x^{2}+4\left\{y<x^{2}+2\right\}$
9. Use Desmos to find a
system of inequalities that makes a cool logo or graphical design.
